

Safety instructions

Before the balloon flight

For your safety, there is a **fire extinguisher**, **fire blanket** and a **first aid box**.

Smoking is not allowed.

Keep about **5 meters** away from the fan, the basket, the anchor rope and the vehicle. Follow instructions from the pilot and crew.

A diagram showing a hot air balloon basket suspended from a fan. A red dashed circle with a radius of 5 meters is drawn around the basket and fan. Several human figures are shown standing within and outside this zone. One figure is marked with a red 'X' and is standing too close to the fan, while others are within the safe zone.

During the balloon flight

Boarding through the **step holes**. Do not touch control lines and cables.

Keep everything onboard during the whole flight. Don't throw anything overboard.

10 minutes before landing, ensure all loose items are stowed and tableware handed over to the chef.

Feel free to alert the pilot to power lines.

During the landing

Look in the opposite direction. Bend your knees slightly and...

hold the rope handles firmly. Always follow the instructions of the pilot

Only disembark after permission from the pilot. After that, stay near the basket.
